

# Moms Kitchen

Decentralizing restaurants by making the world's moms-kitchens a decentralized restaurant.

## Why is this important?

Moms have a valuable skill that is not being monetized and this keeps most of the worlds moms in poverty or earning less than they should.

# Our objective is to revolutionize the restaurant business

WEB3 provides low cost infrastructure for running home businesses. We make this available to mothers with our platform to sell 50 to 100 meals costing on average \$20 per meal and generating revenue of \$1000 to \$2000 daily.

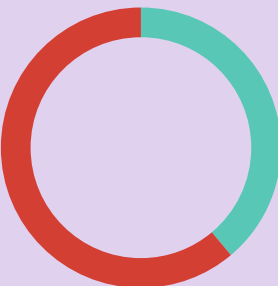

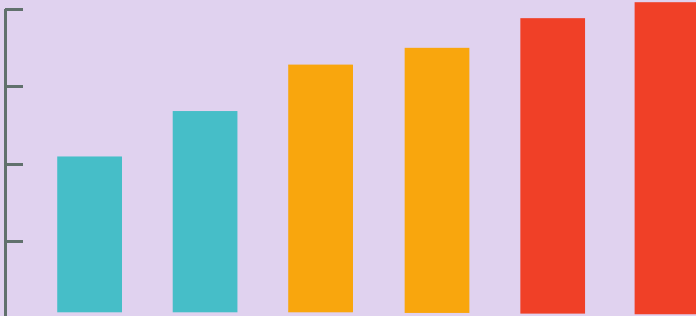

## This a great social good and this how it's achieved

# Mom's Kitchen
